

Glean

[Paid AT Hardware & Software available to all Students Registered with a Diagnosis in Learning Support](#)

Glean is a unique software package to help with navigating, annotating and organizing digital recordings of lectures and seminars. Glean shows you a visual representation of the digital recording. With this tool you can quickly review, reference and identify key sections of speech to support editorial work or research.

Features:

- Importing Audio, Images, Text and Slides
- Grouping, editing and highlighting audio segments
- Linking notes, images and slides with matching audio recordings
- Quick review and organization of previous Notetaker files
